Assignment 20

Set up a Live Site on Github

Create an Account

- Go to Github.com
- If you have an account, sign in
- If you do not have an account, you must register for one

Create a Repository

- Click the plus sign in the upper right corner
- Click "New Repository"
- Under "Repository Name" type the name of your project
- Optional: give the project a description
- Make sure it is marked as "Public"
- Click "Create repository"

Add Your Files

- Navigate to the repository
- Click "Upload files"
- Drag and drop or choose files to upload
- Under "Commit Changes" type a short title like "uploading files"
- Leave "Commit directly to the master branch" checked
- Click "Commit changes"

Make it live

- Navigate back to the repository
- Click "Settings" near the top right
- Scroll down to "Github Pages"
- Under "Source" choose "master branch"
- A link will appear in the "Github Pages" section. This is your sites url.
- Note: It may be a number of minutes before it is available.
